HB 2

Madam Chair & Members of The Committee

My name is Alan BROERE. I work for Home Care Services in Billings and am a member of SEIU Healthcare 775NW. I take care of a 32 year old gentleman who has C.P. and have for the past 13 years.

He is at stage in his medical development that the doctors are saying that all they can do is manage the pain & help all likelihood if I was not there to care for him he would be in a nursing facility somewhere. I feel that it is a fundamental right for all persons be they young or old to be taken care of ^{when needed} in their own familiar surroundings.

2

~~and~~ That is just part of why we are here in to advocate improved wages for Health care worker and to thank you for the Health care of Health care worker program you enabled 2 years ago and ask for it continued and improved existence.

Speaking of Health care my personal involvement is making a big difference in my life. I can finally address some of the personal Health care issues that have been on the back burner for me for the past 10 years.

3

In closing I would like to ask for
your support in helping people stay
in their own familiar surroundings during
trying Medical situations and to ask
that you maintain the Health Care
or Health care works program
and to help improve wages for
long term care workers

Thank you
